

## Addition to Guidelines

8.9 At least 4 ( four ) corners of the construction netting on new dwellings has to be set out by a qualified surveyor, as to ensure that the 25% undisturbed areas are adhered to.

8.10 At least 4 ( four ) corners of a new dwelling to be set out by a qualified surveyor, to ensure that the new dwelling is on the correct coordinates.

This will ensure that undisturbed areas and new dwellings are set out on the correct coordinates and does not encroach on communal property.
